Application No.: 10/603,012 Docket No.: 30205/39412

REMARKS

This paper is filed in response to the office action mailed on July 1, 2004. In the office action, claims 1-4 stand rejected under 35 U.S.C. § 102(e) as allegedly being anticipated by U.S. Patent Application Publication No. 2003/0008968 ("Sugeta"). In response, claims 1-4 have been canceled and the elements of claims 1 and 5 have been combined. Claims 8-10 have been added and therefore only claims 5-10 are pending. The Patent Office admits that Sugeta is not an anticipating or obviating reference with respect to process claim 5 and therefore the prior art rejections based upon Sugeta are respectfully traversed.

Next, the office action rejects claims 1-7 under 35 U.S.C. § 102(e) as allegedly being anticipated by U.S. Patent Application Publication No. 2003/0219682 ("Wakiya"). Applicants respectfully traverse this rejection because Wakiya is not prior art. Specifically, Wakiya is based upon an application serial number 10/443,746, filed in the USPTO on May 23, 2003. The priority date for the present application is November 29, 2002, based upon Korean priority application number 2002-75289. A certified copy of priority document number 2002-75289 was filed with the present application and is reflected on the filing receipt for the present application. To perfect applicants' priority date of November 29, 2002, a verified translation of Korean priority document number 2002-75289 is submitted herewith. Thus, now a verified translation and a certified copy of Korean priority application number 2002-75289 is before the Patent Office.

Thus, Wakiya is not prior art under § 102(e) because it was not filed in the USPTO before applicants' invention or applicants' effective priority date of November 29, 2002. Accordingly, applicants respectfully submit that the § 102(e) rejection based upon Wakiya is improper and must be withdrawn.

An early action indicating the allowability of the present application is earnestly solicited.
